

COMMONLY ASKED QUESTIONS ON THE USE OF THE FACE MASK

Below we inform you of the latest update of [official protocols published by the Generalitat](#) regarding the use of protective face masks in the workplace. The following must be taken into account:

It is necessary for companies to guarantee all protection measures for workers. In companies that are not open to the public, once the worker is in their workplace (sitting and/or doing a task that does not involve mobility) and with all the necessary measures, they can stop wearing the mask, although it is still advisable to wear it.

On the other hand, it is compulsory to wear it when moving through the work centre (entrances, exits, toilets...). Workers whose jobs involve a great physical effort, regardless of whether they are carried out indoors or outdoors (for example, in jobs linked to construction) are exempt from wearing masks provided that their health and safety can be guaranteed.

This information is applicable to all companies with a workplace in Catalonia.

We remain at your disposal to resolve any doubts you may have.
